FREQUENTLY ASKED QUESTIONS:

Why should I take Bod•ē Happy?

Bod•ē Happy may be the right choice for you if you are seeking a dietary supplement to support mental clarity, focus, productivity, alertness, cognitive function, while giving you a natural energy boost.*

How quickly should I see results? Does Bod•ē Happy work for everyone?

We believe people should see results within the first 15-30 minutes; however, since everyone is different physiologically, individual results may vary.

Can I take Bod•ē Happy daily?

Yes, the product can be consumed daily, as directed on the product label.

Where does the caffeine content in Bod•ē Happy come from?

Bod•ē Happy yields the equivalent of 125 mgs of natural caffeine, the perfect level to promote mental focus, increase physical alertness, clarity while increasing your energy.* The caffeine is naturally-derived from the coffee bean and is equivalent to about one and a half cups of coffee. We chose to use this source of caffeine since it is a naturally-derived ingredient that is most compatible with the formula and great flavor of Bod•ē Happy.

How is Bod•ē Happy manufactured?

Bod•ē Happy is made at a facility that meets FDA manufacturing standards called Good Manufacturing Practices. This ensures our product meets the highest quality possible.

Will Bod•ē Happy make me jittery? Is caffeine bad for me?

Some people are sensitive to caffeine; but in moderate doses, it may benefit people interested in enhanced mood and athletic performance.*

The L-Theanine included in Bod•ē Happy works with the caffeine to reverse those unfavorable side effects, instead promoting concentration on mental tasks, producing what some have called an “alert calmness.”*

What are antioxidants?

Antioxidants are substances found in nature that may protect cells from the damage caused by unstable molecules known as free radicals.* Free radicals are a by-product of overexercise, stress, and exposure to dirty air and other environmental pollutants. Bod•ē Happy contains Vitamins A, C, D₃ and E: ingredients that possess antioxidant properties and may help fight free radicals in your body.*

What is the sweetener used in Bod•ē Happy and Bee Happy and why did you choose those sources?

The Bod•ē Happy is sweetened with Sucralose. Sucralose is derived from natural cane sugar through a multistep manufacturing process. It is approved for use in over 80 countries and deemed appropriate for use by all consumers by such health authorities as the World Health Organization (WHO), U.S. Food and Drug Administration (FDA) and the European Food Safety Authority (EFSA).

Individuals who would prefer a natural sweetener will love the Bod•ē Bee Happy, which is sweetened with a blend of natural honey powder and stevia. After extensive research and testing during the product development phase, natural honey powder and stevia were chosen as the best sweeteners for this product. Many of the other sweeteners did not meet our criteria for compatibility with the Bee Happy formulation. The inclusion of premium ingredients, formula efficacy and flavor in the Bod•ē Pro products are our highest priorities.

Can I take Bod•ē Happy if I have a health condition or am taking medication?

As with any dietary supplement, we recommend checking with your healthcare professional before taking Bod•ē Happy. If you are pregnant or nursing, or have a medical condition (including a liver condition), consult your healthcare professional before taking this product. Not recommended for children under 18 years old, individuals who frequently take alcoholic beverages, or those who get an allergic reaction.

Does Bod•ē Happy contain any restricted substances, narcotics or alcohol?

No, Bod•ē Pro products do not contain any restricted substances, narcotics or alcohol but are not recommended to be mixed with alcohol either.
