

## PRODUCT OVERVIEW:

Cell Signals is a revolutionary bioregulator formula designed to **optimize cellular communication and restore cellular efficiency, supporting energy, performance, and systemic balance.\***

As we age, the **production of key cell signaling molecules declines—dropping by up to 90% by the age of 30.\*** This disrupts your cells' ability to vibrate at the frequencies required for energy production, detoxification, repair, and overall health.\* These changes contribute to fatigue, brain fog, slower recovery, and other age-related challenges.\*

Cell Signals combines bioavailable nutrients like **methylated folate and Vitamin B12 with BHB**, a master cell signal and energy-boosting ketone, alongside **cell-supportive amino acids** and the powerful dipeptide L-Carnosine. L-Carnosine plays a unique role in **protecting cells from damage caused by stress and supporting cellular repair and recovery.\*** Together, these ingredients **enhance mitochondrial function, optimize cellular repair, and support detoxification, cognitive clarity, and recovery.\***

By addressing cellular inefficiency, **Cell Signals supports the mitochondria**—the powerhouses of your cells—to help **restore balance and recharge cellular vibrations.\*** This dipeptide bioregulator formula helps your body metabolize energy efficiently and **helps ensure your body performs at its best.\***

## CELL SIGNALS KEY BENEFITS:

**Cellular Energy and Vibration** - ignites cellular communication and enhances mitochondrial function to support energy production, repair, and overall health.\*

**Boosts Energy and Mental Clarity** - delivers clean, sustainable energy and sharpens focus with BHB and bioavailable nutrients like methylated B12.\*

**Enhances Recovery and Performance** - helps active individuals and athletes recover faster by protecting cells from stress and promoting muscle repair with L-Carnosine and amino acids.\*

**Supports Cognitive Health and Focus** - L-Tyrosine enhances neurotransmitter production, helping improve focus, mood, and mental clarity.\*

**Reduces Cellular Stress and Fatigue** - combats damage caused by oxidative stress and environmental toxins, helping your cells stay energized and resilient.\*

\*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

## KEY BENEFITS (CONTINUED):

**Supports Detoxification** - aids the body's natural detox pathways, helping to clear toxins and optimize cellular efficiency for long-term health.\*

**Restorative Sleep** - supports deeper, more restorative sleep cycles, enhancing recovery and promoting overall well-being.\*

## WHO SHOULD TAKE CELL SIGNALS:

- **Anyone Over 30** – Start protecting your cells from the effects of aging and boost energy production.\*
- **Active Individuals & Athletes** – Support muscle recovery and reduce fatigue after intense physical activity.\*
- **People Experiencing Mental Fatigue** – Those needing mental clarity, better focus, and stress resilience will benefit from the cognitive-enhancing ingredients.\*
- **Individuals with High Stress** – Anyone managing stress or fatigue who wants to support their body's natural recovery processes.\*
- **Anyone Looking to Improve Recovery & Detoxification** – Ideal for those looking to optimize cellular health and promote healthier aging.\*
- **Individuals with MTHFR mutations** - Beneficial for those with genetic SNPs affecting detoxification, energy production, or neurotransmitter balance.

### Supplement Facts

Serving Size: 6 Capsules  
Servings Per Container: 30

Amount Per Serving		% Daily Value
Folate (from Calcium L-5 — Methyltetrahydrofolate)	1020 mg DFE (600 mcg folic acid)	255%
Vitamin B12 (Methylcobalamin)	900 mcg	37500%
Calcium	480 mg	37%
BIOLIMITLESS Proprietary Blend	4800 mg	†
Beta-Hydroxybutyrate (BHB) Calcium, Glycine, L-Tyrosine, L-Carnosine, Phosphatidyl Serine		

† Daily Value not established.

**Other Ingredients:** Hypromellose (capsule).

## USAGE INSTRUCTIONS:

**Adults:** Take three capsules in the morning and three capsules in the afternoon for optimal benefits.

For best results, take with a glass of water or your favorite beverage alongside meals.

Please scan the QR code for detailed usage instructions and additional information.

## KEY INGREDIENTS:

**Beta-Hydroxybutyrate (BHB)** – A powerful ketone that acts as a clean energy source for the brain and body\*. As a **Master Cell Signal**, BHB supports cellular communication, enhances metabolism, and promotes fat burning while helping optimize energy and focus.\*

**L-Carnosine** – A unique **dipeptide** that protects cells from oxidative stress and supports recovery.\* L-Carnosine enhances cellular repair, promotes muscle performance, and helps reduce age-related damage at the cellular level.\*

**Methylcobalamin (Vitamin B12)** – A highly bioavailable form of B12 that supports energy production, mental clarity, and nerve health.\* B12 also aids DNA synthesis, ensuring efficient cellular repair and regeneration, especially for individuals with MTHFR genetic mutations.\*

**Methylated B9 (L-5-MTHF)** – The active form of folate essential for DNA repair and detoxification. It also supports neurotransmitter production for brain health, and regulates homocysteine levels for cardiovascular support, and ensures proper DNA repair and synthesis.\*

**Glycine** – A versatile amino acid essential for collagen synthesis, DNA repair, and detoxification. Glycine supports

cellular structure and function while promoting restful sleep and metabolic balance.\*

**Phosphatidylserine** – Phosphatidylserine is a key phospholipid that supports cellular membranes and brain communication. It plays an essential role in cognitive health, focus, and memory, helping promote mental clarity and brain performance.\*

**L-Tyrosine** – An amino acid that aids neurotransmitter production, improving focus, mood, and mental performance. L-Tyrosine also helps the body manage stress more effectively.

**Recharge your cells, renew your health, & restore the signals that drive vitality.\***

## WHY CELLULAR RECHARGE MATTERS:

Every cell in your body communicates constantly to carry out essential functions like energy production, waste elimination, and nutrient absorption. **At the core of your health is cellular vibration—the natural rhythm that drives these processes and keeps your body functioning efficiently.**

Over time, factors like **aging, stress, and toxins disrupt this communication, leading to energy deficits, weakened immunity, increased inflammation, and premature aging.**

Bioregulators like those in Cell Signals—powered by ingredients like the **Master Cell signal BHB** and the **dipeptide L-Carnosine**, help **restore and amplify these cellular vibrations.\*** By optimizing communication and recharging your cells, **Cell Signals supports energy, resilience, and overall vitality at the cellular level.\***

\*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

## WHAT MAKES CELL SIGNALS SPECIAL?

Cell Signals is a groundbreaking dipeptide bioregulator formula designed to **optimize cellular communication and recharge your body** at its core.\* Powered by the **Master Cell Signal BHB**, the **dipeptide L-Carnosine**, and **methylated B vitamins**, this formula supports **energy, cognitive function, detoxification, and cellular repair**.\*

What sets Cell Signals apart is its ability to **restore and sustain cellular signaling**, ensuring **your cells operate efficiently** as you age\*. Dipeptides like L-Carnosine are unique in their ability to **support cellular repair** and **protect against oxidative stress**, helping to maintain balance at the cellular level.\* Combined with the precision of bioavailable nutrients, Cell Signals delivers **targeted support to improve energy production, detoxification processes, and overall resilience**.\*

A key benefit of Cell Signals is its inclusion of active **forms of B9 (L-5-MTHF) and B12 (Methylcobalamin)**. These bioavailable nutrients are **critical for individuals with genetic predispositions**, such as **MTHFR mutations**, ensuring **efficient nutrient absorption** and utilization for energy, focus, and cellular health.\* With **over 65% of the population** carrying at least one MTHFR mutation, this targeted approach makes Cell Signals **essential for optimizing long-term cellular function** and performance.\*

## FREQUENTLY ASKED QUESTIONS:

### What is Cell Signals, and why should I take it?

Cell Signals is a cutting-edge bioregulator formula designed to optimize cellular communication, support energy production, and combat the effects of aging.\* It revitalizes the body at the cellular level by improving cell signaling and restoring optimal frequencies for better energy, recovery, cognitive health, and detoxification.\* Perfect for those over 30, athletes, or anyone experiencing fatigue or mental fog, Cell Signals helps your cells perform at their best, every day.\*

### How does Cell Signals help improve energy and focus?

Cell Signals boosts energy by supporting mitochondrial health and enhancing ketone-based metabolism, which helps provide sustained, clean energy without crashes.\* Additionally, it optimizes neurotransmitter levels with ingredients like Tyrosine and Methylcobalamin (Vitamin B12), improving mental clarity, focus, and overall cognitive performance.\* Whether you're looking to enhance productivity or physical performance, this formula delivers the support your body needs to stay energized and sharp.\*

### Why is cellular vibration so important for my health?

Cellular vibration is the natural rhythm at which your cells communicate and function. When cells vibrate at their highest frequencies, they produce energy, repair tissue, detoxify the body, and support cognitive function. Over time, aging, stress, and toxins disrupt these vibrations, leading to fatigue, inflammation, and accelerated aging. Cell Signals helps restore and amplify these vibrations, ensuring your body functions optimally as you age.\*

### What makes this formula different from the others?

Unlike standard supplements, Cell Signals addresses the root cause of cellular dysfunction—loss of natural signaling ability.\* This unique formula uses a powerful dipeptide, L-Carnosine, along with a Master Cell Signal, Beta-Hydroxybutyrate (BHB) and other bioavailable nutrients like Methylcobalamin (Vitamin B12), to restore proper cell communication and maintain optimal cellular frequencies.\* It's a powerful blend of ingredients designed for enhanced energy, detoxification, cognitive health, and overall vitality.\*

\*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.
