

PRODUCT OVERVIEW:

What better way to ensure you get the vitamins and minerals you need than with an energy drink you can feel good about drinking? Verve Sugar Free shatters the typical energy drink mold with its insanely healthy ingredients. This innovative product features the Verve® formula plus caffeine and energy-enhancing nutrients. With only 4 calories, zero sugar and 1 gram of carbs, Verve Sugar Free provides sustained energy and ultra-premium nutrition without the empty calories or sugars.

Boasting a refreshing, lightly carbonated tropical flavor, Verve Sugar Free delivers insanely healthy energy when you need it most.

HEALTHY ENERGY ON DEMAND

Nourishes by delivering 12 essential vitamins and essential plant-sourced minerals.

Protects cellular integrity.

Revitalizes energy levels with a blend of caffeine (yielding 120mg of caffeine) and energy-enhancing nutrients.

Supports a healthy lifestyle for those seeking a long-lasting energy beverage without the sugar or extra calories.

KEY INGREDIENTS:

12 essential vitamins (including antioxidant vitamins A, C and E)
— Vital for well-being.*

Plant-sourced mineral blend — Major, trace and ultra-trace ionic, life-giving nutrients.

Phytonutrient ingredients — A blend of powerful plant and natural components.

Whole-fruit Mangosteen — An abundant supply of whole-fruit mangosteen and beneficial pericarp (rind) extract that provides some of the highest quantities of xanthones found in nature.

Organic glyconutrient-rich aloe vera — A powerful phytonutrient known to provide the body with many beneficial effects.*

Organic green tea — For additional phytonutrient protection.

Caffeine — A naturally-derived caffeine source from the coffee bean that is known to support enhanced mood, alertness and athletic performance.*

Taurine — An amino acid that is an important component for a wide range of activities.

D-ribose — A sugar that occurs naturally in all living cells, and enhances energy production.*

Inositol — A B vitamin that helps with cellular communication.

Choline chloride — A phospholipid naturally found in the nervous system tissues, that supports a variety of functions in the body.*

MANGOSTEEN POWER:

Mangosteen is a rare superfruit primarily found in Southeast Asia and scientifically known as *Garcinia mangostana*. No relation to the mango, it has been hailed as the “Queen of Fruits” and has been used for centuries by Asian practitioners for a variety of conditions.

Of all the known sources for xanthones, the mangosteen supplies some of the highest amounts found in nature. Xanthones are a biologically active phytonutrient with very potent free radical scavenging properties.

The entire mangosteen fruit, including the pericarp (rind) and pulp, is utilized during Bod•ē Pro proprietary extraction process. This intricate method helps ensure that the highest levels of nutrients are included in the Verve formula.

No Sugar
No Artificial Colors
No Artificial Flavors
No Gluten
No High Fructose
Corn Syrup

THE SCIENCE OF MINERALS:

Your physical well-being can be more directly dependent upon the minerals you take into your body than almost any other factor. Minerals help support the organs, bones and the immune system. Verve Sugar Free has a unique mineral blend to help your overall well-being. It contains 100% ionic, life-giving minerals that are reduced to the smallest, most bioavailable form. Verve Sugar Free's minerals are sourced from plant vegetation that has been undisturbed for thousands of years. These unprocessed phytonutrients include major, trace and ultra-trace, plant-sourced minerals.

- The body cannot survive without nature's fundamental minerals, yet it cannot manufacture minerals. They must be obtained from the diet or through supplementation.
- Modern-day diets may lack the appropriate balance of minerals due to mineral-depleted soils and over-processed foods.
- Minerals are needed for energy production, protection from free-radical damage and other vital functions.
- Minerals provide a foundation for your optimal health.

3 POWERFUL PRODUCTS INSIDE VERVE:

1. A refreshing, fast-acting energy blend.
2. An ultra-premium vitamin and mineral beverage.
3. A powerful superjuice with mangosteen and aloe phytonutrients.

REFRESHING ENERGY BOOST WITHOUT THE SUGAR:

- 120mg of caffeine
- Unique blend of energy-enhancing ingredients
- Verve formula
- Whole-fruit Mangosteen
- 12 essential vitamins
- Essential plant-sourced minerals
- Lightly carbonated 12-oz beverage
- Refreshing tropical flavor

VERVE SUGAR FREE TARGET MARKET:

For those who are sugar-conscious, Verve Sugar Free is the perfect alternative for anyone to enjoy the energy and nutrition benefits of Verve, without the sugar or extra calories. Verve, without the sugar or extra calories.

Ingredients: ultra-purified reverse osmosis carbonated water, taurine, natural flavors, citric acid, mangosteen extract (pericarp) (standardized 10% xanthones), malic acid, ascorbic acid, reconstituted mangosteen juice (Garcinia mangostana L.) (fruit), natural caffeine, potassium sorbate (flavor protection), calcium lactate, plant-sourced mineral blend, magnesium citrate, d-ribose, inositol, xanthan gum, phosphoric acid, d-alpha tocopheryl acetate, sucralose, organic glyconutrient-rich aloe vera gel (leaf), potassium citrate, organic green tea (leaf), niacinamide, choline chloride, Selenium Select 5000 DCP (0.5% Selenium), calcium d-pantothenate, pyridoxine hydrochloride, sodium chloride, riboflavin USP, beta-carotene, thiamin hydrochloride, folic acid, d-biotin, cholecalciferol and cyanocobalamin

FREQUENTLY ASKED QUESTIONS:

Is it necessary to take a multivitamin if I am also drinking Verve Sugar Free?

If you are drinking Verve Sugar Free, there is no need to take a multivitamin supplement. We suggest consulting with your healthcare professional if you have additional questions.

What is the sweetener profile for Verve Sugar Free and why was it chosen?

After extensive research and testing during the product development phase, Sucralose was chosen as the best sweetener blend for this product. Many of the other non-calorie sweeteners did not meet our criteria for compatibility with the Verve Sugar Free formulation. The inclusion of premium ingredients, formula efficacy and flavor in the Verve products are our highest priorities. Verve thoroughly reviews scientific data for all potential ingredients.

Where does the caffeine in Verve Sugar Free come from?

It comes from the coffee bean, which is a naturally-derived caffeine source.

Is caffeine bad for me?

Some people are sensitive to caffeine, but in moderate doses it may benefit people interested in enhanced mood, alertness and athletic performance.

What are antioxidants?

Antioxidants are substances found in nature that may protect cells from the damage caused by unstable molecules known as free radicals. Free radicals are a by-product of over-exercise, stress, and being exposed to dirty air and other environmental pollutants. Verve Sugar Free contains Vitamins A, C and E, and selenium: ingredients that possess antioxidant properties and may help to fight free radicals in your body.

What are xanthones?

Verve Sugar Free contains xanthones, which are natural phytochemicals found in the exotic mangosteen superfruit that possess very potent free radical scavenging properties. Of all the known sources for xanthones, the mangosteen supplies some of the highest amounts found in nature.

Which minerals are included in Verve's proprietary mineral blend?

The proprietary mineral blend contains major, trace and ultra-trace minerals. Because we source our minerals from naturally occurring plant vegetation, the level of individual minerals may vary slightly from batch to batch.

Why are major, trace and ultra-trace, plant-sourced minerals used?

Because plant-sourced minerals come from Mother Nature herself! Here's how it works: Plants assimilate minerals from the soil they are embedded in, and in the process, they become highly nutritious for humans to eat. Minerals can be found in nearly all foods that are grown in soil, but the problem is, modern-day food processing and overused croplands make it nearly impossible to get a wide spectrum of minerals from our diets. Verve's minerals are not man-made, but are carefully extracted from plant vegetation that has been undisturbed for thousands of years, to help replenish the full spectrum of minerals, at levels that nature intended. Major, trace and ultra-trace indicates a level at which a mineral might be needed within the body; however, it is not indicative of the importance of that mineral — all minerals are vital to life.

What is organic glyconutrient-rich aloe vera and why is it important?

Organic aloe vera is a powerful glyconutrient that originated in Africa and has been used for centuries because of its versatility and life-giving minerals, vitamins and polysaccharides.

Why is organic green tea important?

Green tea is well studied and documented for its traditional use. Organic green tea is added to Verve, the formula found in Verve Sugar Free, because it possesses numerous compounds that provide additional free radical protection.

How is Verve Sugar Free processed?

Verve Sugar Free is manufactured using a special proprietary process and special can lining to protect the delicate balance of vitamins, minerals and phytonutrients right up to the moment of consumption.
